PROFILE

Data Analyst with 9+ years of experience delivering end-to-end analytics solutions across commercial, operations, and finance domains in the UAE. Specialized in integrating and migrating data from ERP systems including Oracle, SAP, IBM, Sage, and Deltek into cloud platforms using Azure Data Factory and Snowflake, with deep expertise in SQL, Python, and dbt for data transformation and quality. Proven track record designing Power BI and Tableau dashboards and semantic data models that replace manual reporting and drive executive decision-making. Strong differentiator in GIS-based spatial analytics across UAE and GCC commercial projects.

EXPERIENCE

Sep 2024 – Present

Data Analyst (ERP & Engineer) - AD Ports Group

- Led end-to-end migration of 5M+ financial records from legacy system and Manual to Snowflake, designing Azure Data Factory ETL pipelines with a Bronze → Silver → Gold Delta Lake architecture; maintained ~100K+ monthly ERP record ingestion into Azure Data Lake & Snowflake with 99.2% post-migration accuracy.
- Developed 20+ Power BI dashboards featuring advanced DAX, Row-Level Security, and paginated reports for C-suite and finance stakeholders; reduced monthly financial close reporting cycle from 5 days to same-day availability through automated refreshes and optimized SQL models.
- Built a Python (pandas + Great Expectations) data quality framework to automate pre-load validation of ERP feeds, catching schema drift, null violations, and duplicate keys; reduced data incidents by 60% and streamlined customer account reconciliation.
- Optimized SQL queries & data models to improve dashboard performance and reporting accuracy; documented end-to-end data lineage in Microsoft Purview to ensure auditability, compliance, and transparent raw-to-gold layer workflows.
- Architected a centralized Snowflake data warehouse using a Star Schema (8 fact, 30+ dimension tables) consolidating ERP, CRM, and procurement data; implemented dbt transformation models to establish a single source of truth for revenue, vessel movement, container movement, and headcount KPIs, replacing 40+ siloed Excel reports.

Sep 2021 – May 2024

Technical Data Analyst (ERP + CRM) – ON24 Inc.

- Led data integration & cloud migration: Engineered ETL pipelines (SQL, Python, SSIS) integrating ON24, HubSpot, Salesforce,

EDUCATION

- M.Sc. in Mathematics - St. Aloysius College (Deemed to be University), Mangalore – 2015
- B.Sc. in Physics, Chemistry & Mathematics - St Aloysius (Deemed to be University) – 2013

KEY SKILLS

- Data Integration & Engineering: Azure Data Factory - SSIS - dbt - Apache Spark - Airflow - Delta Lake - Snowflake - Oracle DB - SQL Server - PostgreSQL
- ERP Systems: Oracle Fusion Cloud - SAP S/4HANA - IBM Cognos - Sage Evolution - Deltek Vantagepoint - Microsoft Dynamics 365
- Programming & Query: SQL (advanced) – GSQl- Python (pandas, NumPy, Great Expectations) - PySpark -Shell Scripting
- BI & Visualization: Power BI (DAX, RLS, Paginated Reports, Power Query) - Tableau - ArcGIS / QGIS - Esri - Excel (advanced)
- Cloud Platforms: Microsoft Azure - Oracle Cloud (OCI) - AWS – Snowflake – IBM
- Data Governance & Quality: Microsoft Purview - Great Expectations - Data Lineage - Data Quality Validation – Deduplication
- Data Modeling: Star Schema - Dimensional Modeling - Fact & Dimension Tables - Semantic Models - Kimball Methodology
- Dev & Collaboration Tools: Git - Azure DevOps - Docker - Jira - VS Code - Jupyter Notebooks

Dynamics 365, into SQL Server/Azure SQL; consolidated project cost, revenue recognition, and vendor payable data onto a unified platform for the first time, improving data delivery speed by 20%, cutting troubleshooting time by 35%, and enabling remote BI refresh with reduced infrastructure overhead.

- **Built advanced analytics & reporting:** Developed complex SQL queries (CTEs, window functions, dynamic pivots) and Spark-based log processing for multi-GB datasets to produce weekly management packs on revenue variance, project burn rate, and headcount cost; distributed to 3 business units and improved troubleshooting turnaround by 30%.
- **Delivered impactful Power BI solutions:** Created 10+ dashboards including compliance/fraud-monitoring tools (Elasticsearch backend) and geospatial visualizations (Esri ArcGIS connector) for site performance and regional revenue distribution; reduced stakeholder response times by 25% through QA governance, Row-Level Security, and automated refresh workflows.

Aug 2020 – Feb 2021

Data Associate (Data Handling & Automation) - **Amazon**

- **Improved operational efficiency through data quality:** Managed high-volume customer data workflows in SQL/Excel, reducing invoice dispute resolution time by 25% and enhancing audit efficiency by 15% through structured validation and reconciliation.
- **Supported incident resolution with trend analysis:** Used Python and MongoDB to analyze backend incident logs and identify recurring patterns; basic trend modelling helped improve SLA adherence by 20% through proactive diagnostics.
- **Facilitated knowledge transfer & adoption:** Produced clear data dictionaries, field mapping guides, and dashboard user manuals to support client handover and internal training, accelerating stakeholder adoption of new reporting tools.

CERTIFICATION

- IBM Data Engineering Professional Certificate – Python, SQL, ETL, Apache Spark, Data Pipelines
 - Snowflake Data Engineering Professional Certificate – Snowflake, SQL, Cloud Data Warehousing
 - AWS Developer Specialization – AWS Lambda, EC2, S3, Cloud Development
-
